

Environmental Infrastructure Working Group ~ In-Take Document ~ December 2008

Purpose of this document

This document provides an overview of the community/region's infrastructure needs to the EIWG Task Force. It is a brief summary of the problem(s), prior efforts to resolve the problem(s), if any, and expected community benefits upon resolution of the problem. The community/region and members of the task force will discuss these infrastructure needs in more detail at the Environmental Infrastructure Working Group (EIWG) meeting.

The EIWG Task Force members will use the information provided in this document to identify technical assistance and funding programs that best serve the community/region's needs. Should you need assistance in completing this document, please call the number listed on the last page.
