RESOURCES**

WEBINARS

WHAT SYSTEMS ARE SAYING

“ Our board approved new water and sewer rates and connection fees. I firmly believe ”
that we never would have been able to get to this point without your assistance.

- County Engineer, County Board of Commissioners

“ We could not have (designed our rate structure) without your help. ”

- Board President

“ We are fortunate to have such a skilled and professional group as yours work on this project. ”

- Town Mayor

AMERICAN SAMOA: SUMMARY OF SERVICES PROVIDED

At the beginning of the project, Heather Himmelberger and staff held a call with personnel from American Samoa. Based on the discussions, it was believed that systems would be willing to travel to Hawaii.

Individuals from American Samoa were invited to the workshops in Hawaii but unfortunately, none of these individuals attended.
