

Smart Management for  
Small Water Systems

# Navigating Water Infrastructure Funding Programs for Small Water Systems in Utah

Washington County Water Conservancy District, Saint George, UT  
12/15/2015

Facilitator: Stacey Isaac Berahzer, Environmental Finance Center at UNC

This program is made possible under a  
cooperative agreement with EPA.

# Water System Revenues

© 2004 Ted Goff

**“This part of the plan will be funded with all the unused money we must have laying around someplace.”**

# Session Objectives

- Understand how to pay for the costs of running your water system
- Look more closely at your rates

# How much money do you need?

# Systems Love Low Rates, but...

“Once again, the [City’s] Water Department proved to have some of the lowest water and sewage rates in the state.”

The screenshot shows a city website with a navigation menu on the left and a news flash article on the right. The navigation menu includes links for Job Openings, Citizen Survey Results, Council Agenda, Comprehensive Planning Information, Community Assessment, and E-News Signup. The news flash article is titled "News Flash - All" and "News Flash - Home" and is dated January 8, 2007. The article text states: "Once again, the City of [redacted] and sewage rates in [redacted] recent s [redacted] providers to evalu [redacted] rates residents p [redacted] City of [redacted] is proud to say, based on [redacted] household, the City has the third lowest water a [redacted] proved to have the third lowest water bill of \$15.38, and sewage bill of \$10.36. As a result, [redacted] proved to have the third lowest combined residential water and sewage rates, of the 63 polled." The article also mentions that commercial rates were compared among the same providers, based on 150,000 gallons per month, and that [redacted] has the lowest sewage, as well as the lowest combined water and sewage rates of those polled. The average commercial monthly sewage bill is \$222.00, with the combined [redacted].

## Will it provide sufficient cost recovery?

Are we following the applicable laws?

What exactly does this include?

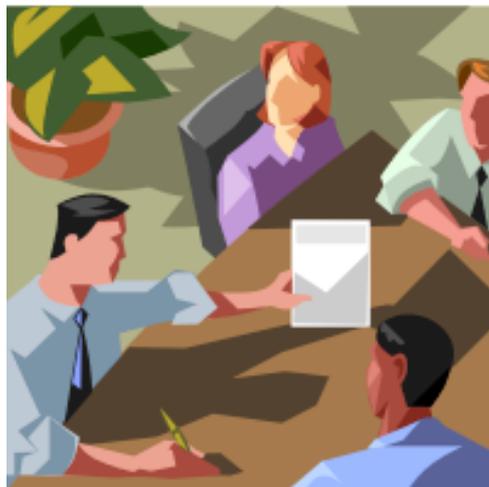

Will revenues be resilient to changing water demands?

Are we allocating the costs to the right customers?

Do these rates send the right signals to our customers, based on our objectives?

Will our customers understand these rates?

Will our customers be able to pay these rates?

# “Full Cost Pricing”

- Operations & maintenance expenditures
- Taxes and accounting costs
- Contingencies for emergencies
- Principal and interest on long-term debt
- Reserves for capital improvement
- Source water protection

# Ways To Pay

- Pay as you go (current receipts)
- Save in advance and pay
- Pay later (someone loans you money)
- Grants (let someone else pay)

# Grants Aren't Completely Free Money

- Application for the grant can be expensive – staff time and money
- Applications can take months to process
- Often lots of strings attached
- Often require a percentage match
- Lots of competition
- Difficult to sustain

# Quick Thought on Grants

- This presentation is about ***sustainable*** program finance
- Grants are not sustainable finance

# The Main Source: Your Revenue

- Pay as you go (current receipts)
- Save in advance and pay
- Pay later (someone loans you money)
- ~~• Grants (let someone else pay)~~

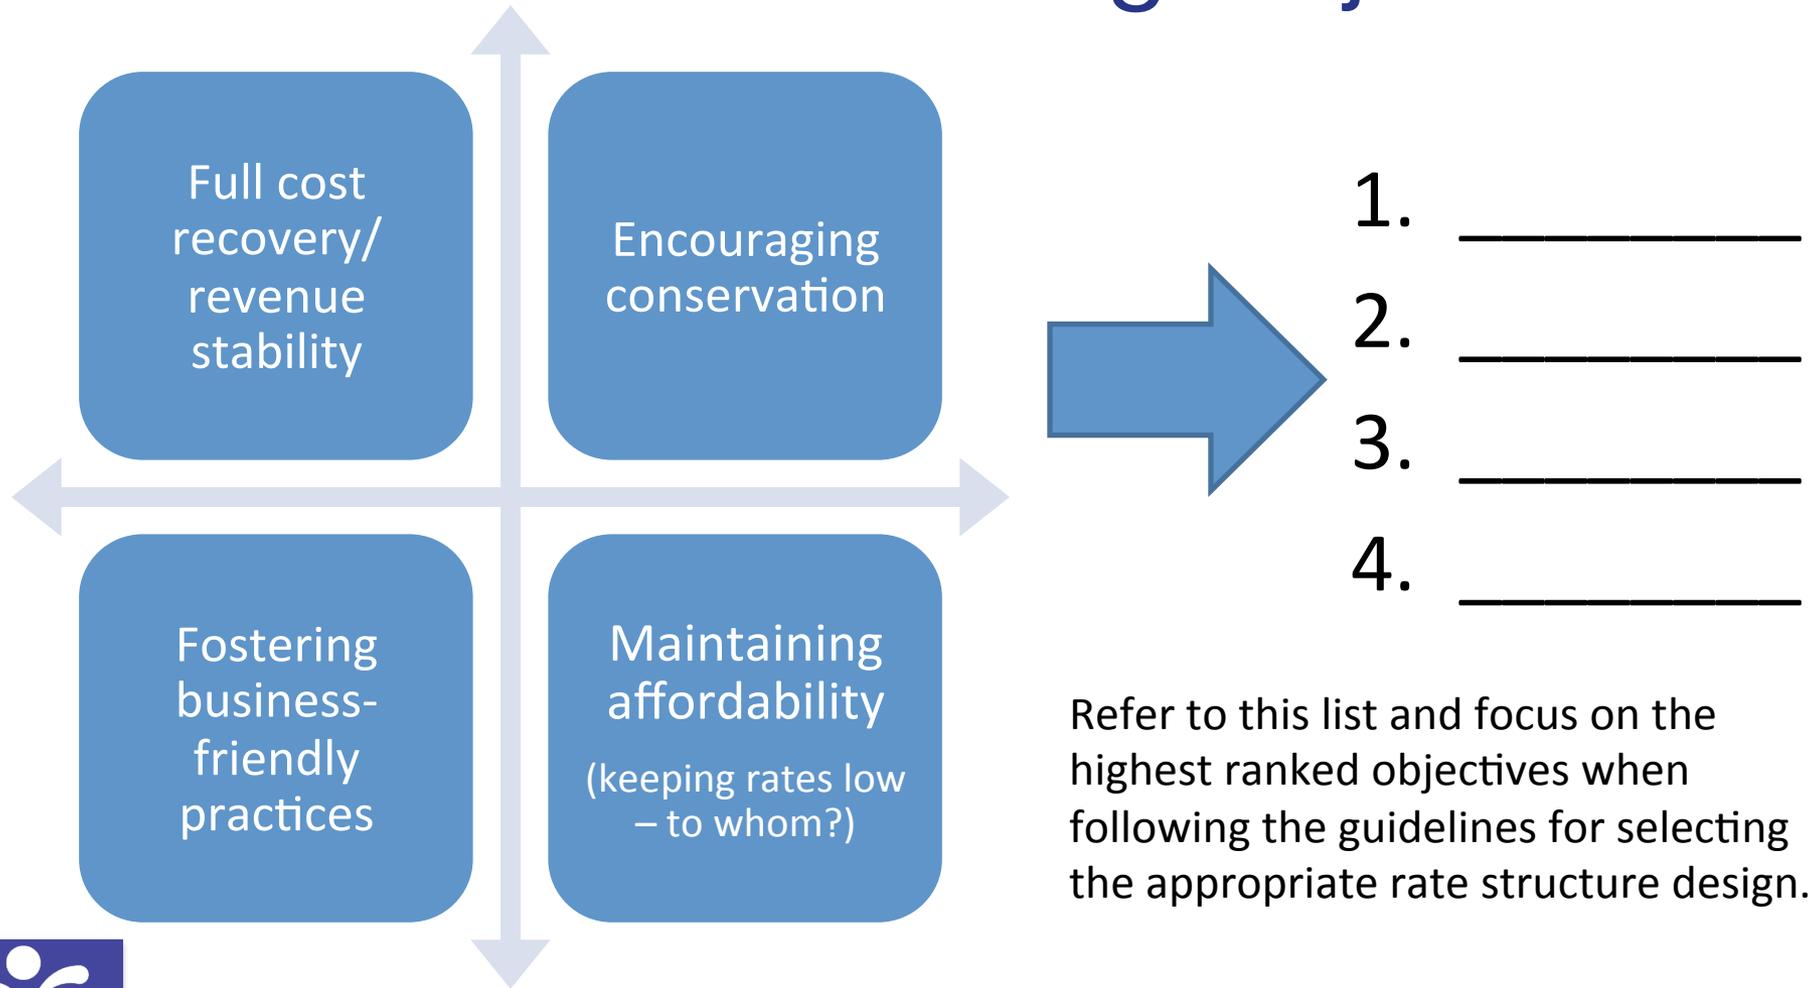

# Rates & Monthly Charges

- What type of rates and monthly charges do you levy?
  - Charges based on metered usage?
  - Flat monthly charges?
  - Something else?
  - Nothing?

# Rank Your Rate Setting Objectives

Refer to this list and focus on the highest ranked objectives when following the guidelines for selecting the appropriate rate structure design.

# What are your rate setting objectives?

## With others from your system, fill out page 1 of the exercise

# Elements of Rate Structure Designs

1. Customer classes/distinction
2. Billing period
3. Base charge
4. Consumption allowance included with base charge
5. Volumetric rate structure
6. (If applicable) Number of blocks, block sizes and rate differentials
7. (Optional) Drought Rates
8. Frequency of rate changes

# Customer Classes/Distinctions

- One rate structure for all
- Target: All are equal

# Customer Classes/Distinctions

- Separate rate structure for residential, irrigation, commercial, industrial, governmental, or wholesale customers
- Target: Specific type of customer

# Customer Classes/Distinctions

- One rate structure, but with different base charges based on meter size
- Target: Non-residential or multi-family housing

# Customer Classes/Distinctions

- One rate structure for all, but with blocks that implicitly only target non-residential use
- Target: Non-residential

# Customer Classes/Distinctions

- Different rates for customers outside municipal limits/service area boundaries
- Target: “Outside” customers

# Customer Classes/Distinctions

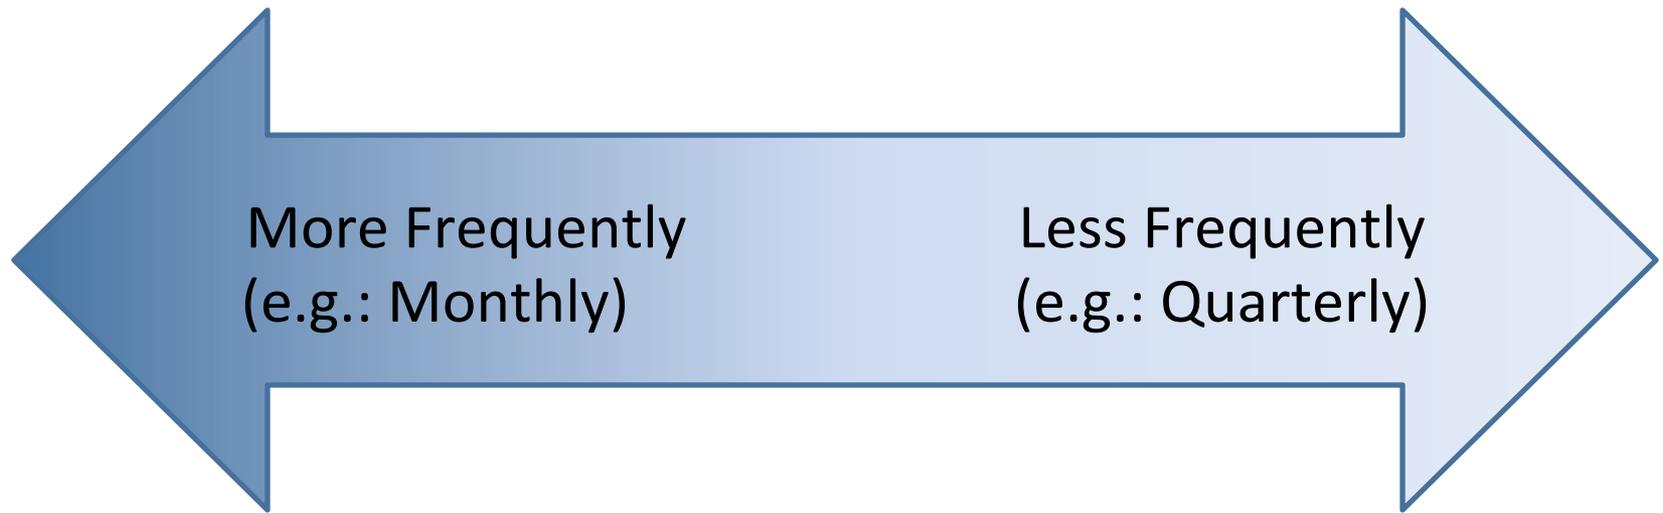

- Negotiated rate structure with individual high-use customers (typically an industrial customer)
- Target: Only one customer

# Mark your Customer Classes on your exercise sheet

# Billing Period

*Suggestion: Use a monthly billing period if you can afford it*

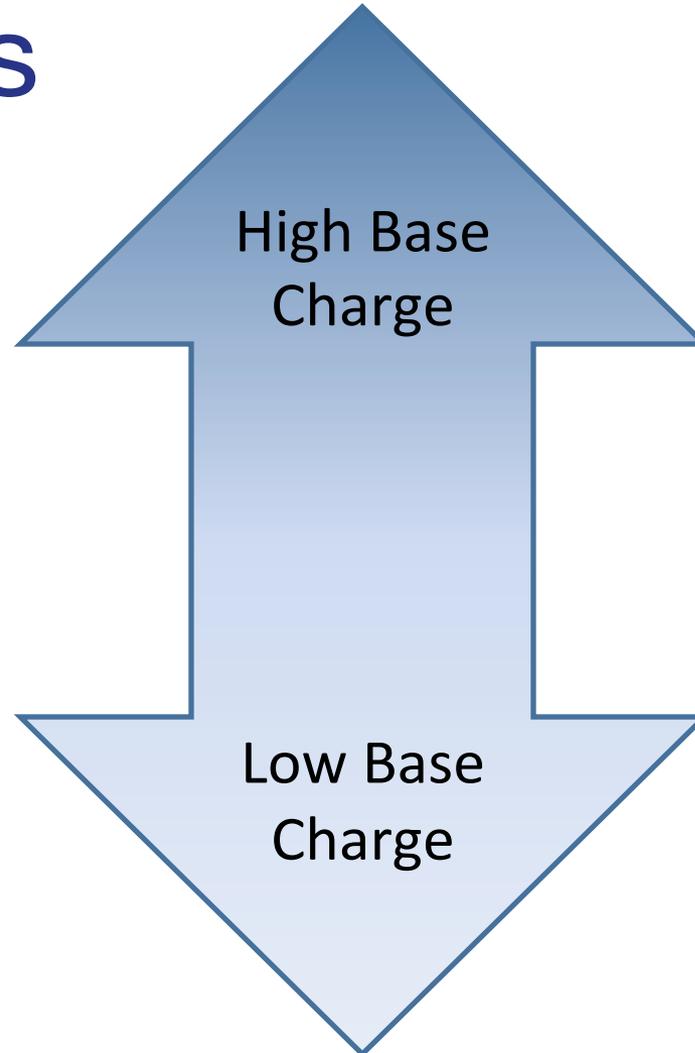

# Mark your Billing Period on your exercise sheet

# Base Charges

*Suggestion:  
Smaller utilities  
should lean  
towards higher  
base charges*

# Mark your Base Charge on your exercise sheet

# Consumption Allowance with Base Charge

Do not include any (0 gallons)

Include some amount (e.g. 1,000 gal/mo)

Include high amount (e.g. 3,000 gal/mo)

*Suggestion: For systems with low base charges, do not include any consumption allowance. For systems with high base charges but wish to encourage conservation, keep consumption allowance low, if any.*

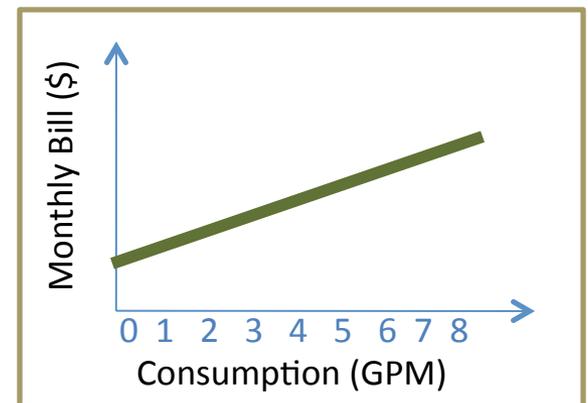

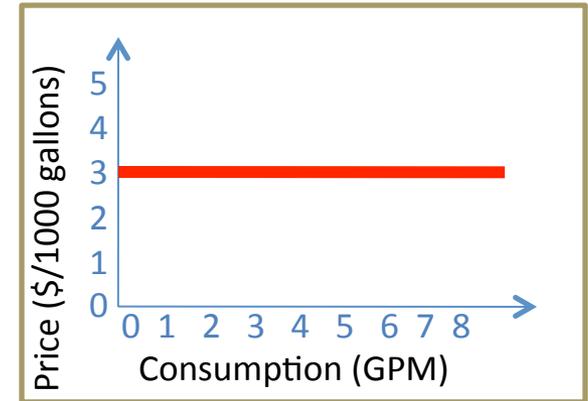

# Mark your Consumption Included in the Base Charge on your exercise sheet

# Volumetric Rate Structure

## Uniform (“Flat”) Rates

- Fair and simple

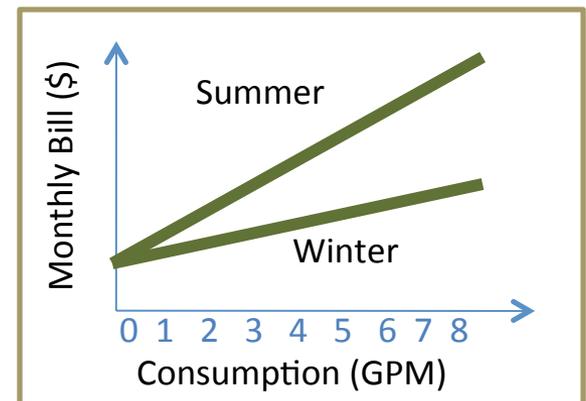

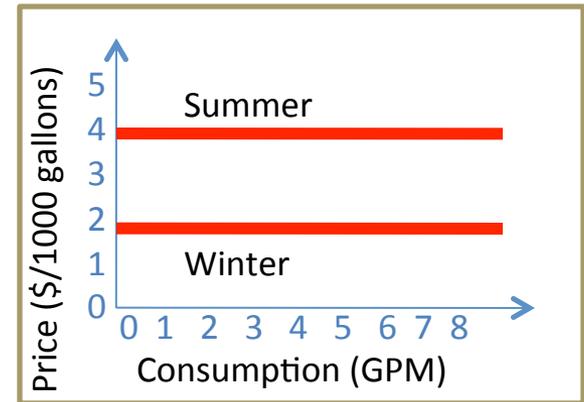

# Volumetric Rate Structure

## Seasonal (Uniform) Rates

- Conservation-oriented, good for seasonal communities

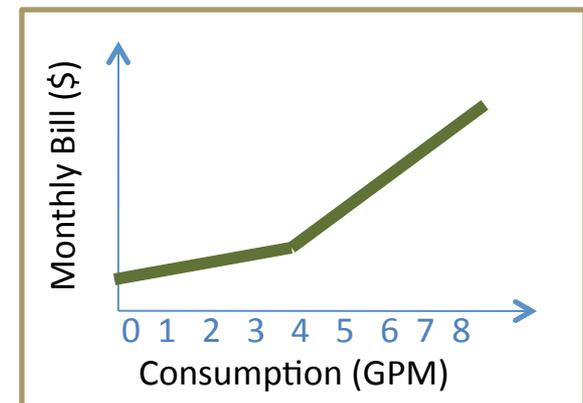

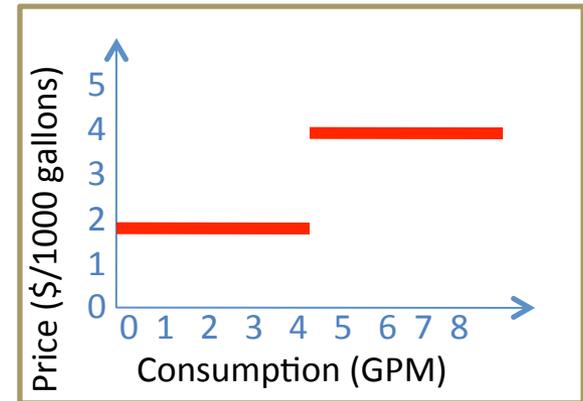

# Volumetric Rate Structure

## Increasing Block Rates

- Conservation-oriented
- Consider large families

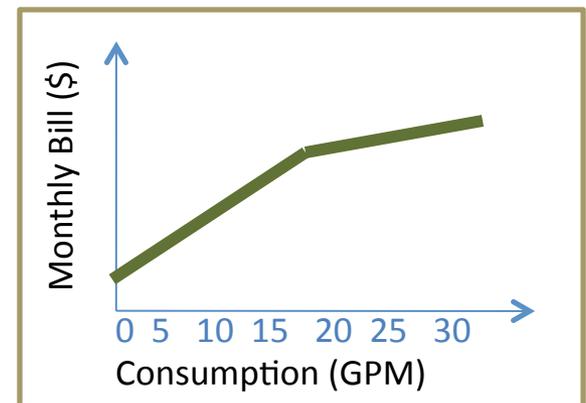

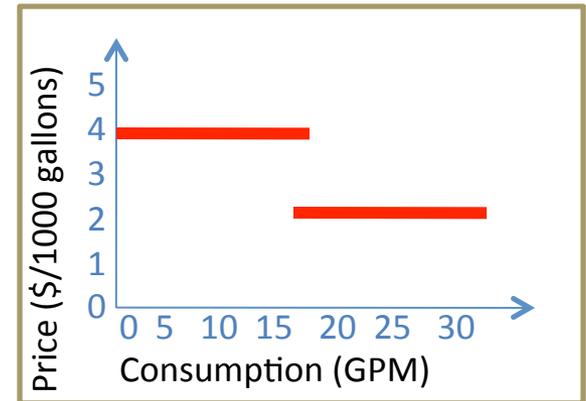

# Volumetric Rate Structure

## Decreasing Block Rates

- Provide price break for large users (e.g.: commercial)
- Do not use for residential

# Mark your Rate Structure on your exercise sheet

# (If Applicable) Block Designs

For block rate structures to be effective:

- Decide on the correct number of blocks
- Decide on where the blocks should end/start
- Set significant rate differentials between blocks

# (If Applicable) Block Designs

For block rate structures to be effective:

- Keep in mind your base charge and consumption allowance
- Meter reading must be punctual, and meters must be replaced frequently
- Think about large families

If you have block rates, mark  
your Number of Blocks on your  
exercise sheet

# (Optional) Drought Rates

- Prepare for drought in advance: create an ordinance *in advance* to give the utility the ability to raise rates temporarily during a water shortage scenario (sometimes called “drought surcharges”).

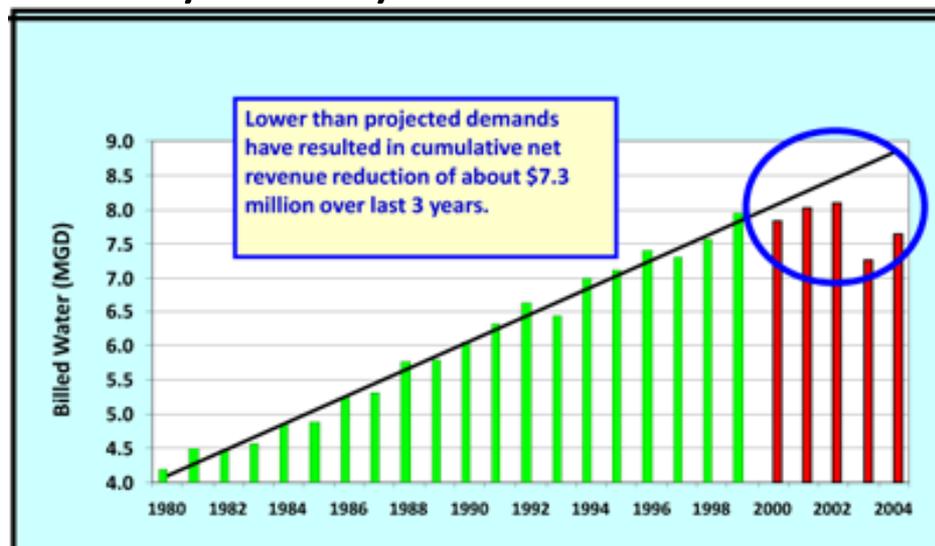

# Mark whether you have Drought Rates on your exercise sheet

# Background Information: How Rates and Usage Interact

Public Perception:

Utility Reality:

Source: Fayetteville Observer 2/6/2004

Source: Orange Water & Sewer Authority

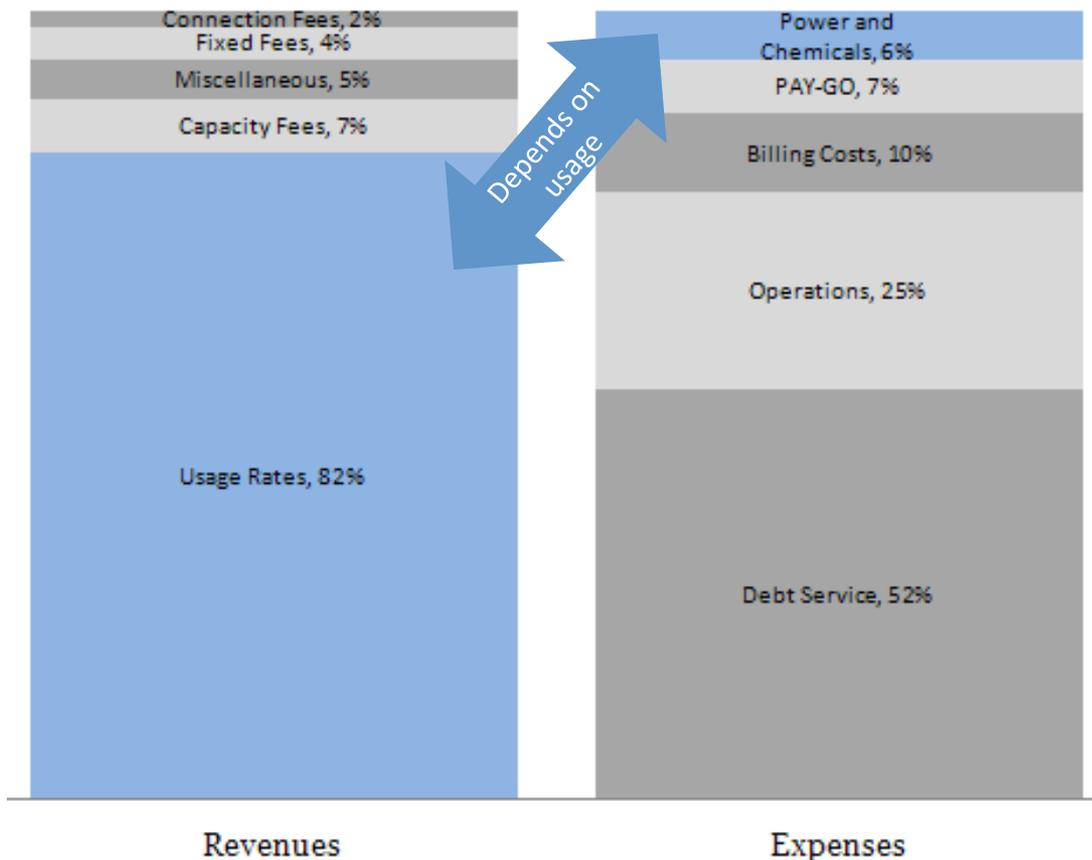

# Why Does this Happen?

Utilities' costs are mostly *fixed*, not dependent on the amount of water sold/used by the customers. But the majority of revenues come from the amount of water sold. If customers conserve, revenues drop significantly but not costs.

Revenue and Expenses for Charlotte-Mecklenburg Utilities in a Given Year

Source: CMU Director Doug Bean's presentation to the Charlotte City Council on December 1, 2008.

# Frequency of Rate Changes

- Always review your rates annually (recommended)
- Review your financial health indicators annually, and then review your rates if any of the indicators reflect poor financing
- Raise rates each year automatically based on inflation

# Mark your Frequency of Rate Review on your exercise sheet

# Frequency of Rate Changes

- *Important: Avoid maintaining low rates at the expense of your utility's financial health. It will either lead to a sudden, massive rate increase in the future or to failing systems and endangering public health.*

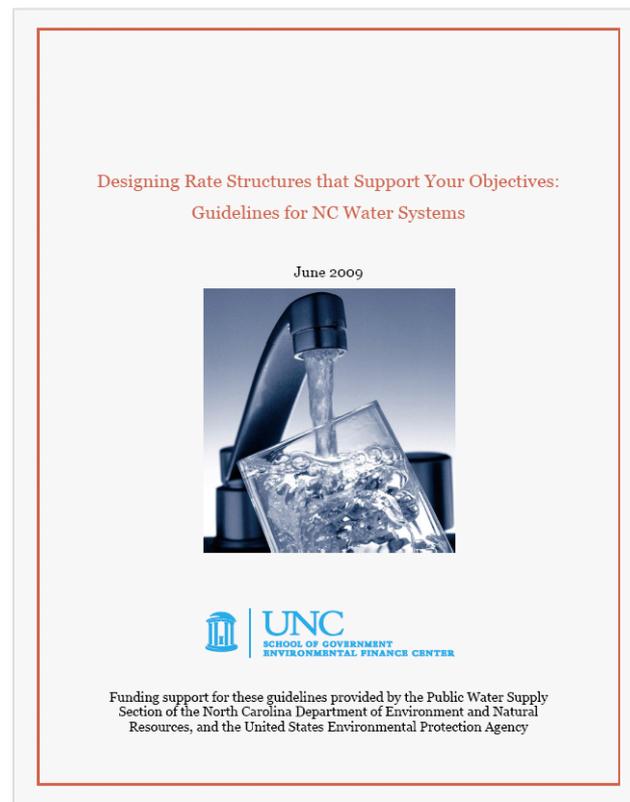

# Designing Rate Structures That Support Your Objectives

Free guide  
written for  
system  
managers

Available at:

<http://efc.sog.unc.edu/>

Look at your rate setting objectives. Look at your rate structure. Do they line up? What changes do you want to consider?

# Periodic Charges

- Deposits on new accounts
- Penalties for late payment

# Water and Sewer Rates Analysis Model

# Free, rate-setting tool using only MS Excel, developed by the Environmental Finance Center at UNC.

## Water and Sewer Rates Analysis Model

Version 2.7 (updated March 24, 2014)

*20-year fund balance estimates under proposed new rates vs. existing rates; compare side-by-side  
Uniform or block rates Residential and non-residential rates Changes to customers and demands*

### INSTRUCTIONS

- 1) Click on tabs at bottom of screen to navigate to different pages.
- 2) On the **"Data Input 1"** tab enter current and new rate details in the dark green cells.
- 3) On the **"Data Input 2"** tab enter current consumption levels, utility finances, and other assumptions in the dark green cells.
- 4) On the **"Charts"** tab, see projections of the End of Year Fund Balance, and input a Fund Balance Policy in the dark green cell at the top of the page.
- 5) Compare new rates to existing rates in **"Compare Monthly Bills"** and their impacts on costs and revenues in **"Existing Rates"** or **"New Rates"**.

Rate Structure			2012	
Residential Rates			Existing	
Water Base Rate			\$10.00	
<b>Water:</b>				
Block Rate 1 (\$1,000 gal)	2,001 gal/mo	2,000 gal/mo	\$1.00	
Block Rate 2 (\$1,000 gal)	2,001 gal/mo	5,000 gal/mo	\$2.00	
Block Rate 3 (\$1,000 gal)	5,001 gal/mo	7,000 gal/mo	\$3.00	
Block Rate 4 (\$1,000 gal)	7,001 gal/mo	12,000 gal/mo	\$4.00	
Final Block Rate (\$1,000 gal)	12,001 gal/mo		\$5.00	
<b>Sewer Base Rate</b>				
Sewer:			\$10.00	
Block Rate 1 (\$1,000 gal)	gal/mo	2,000 gal/mo	\$1.00	
Block Rate 2 (\$1,000 gal)	2,001 gal/mo	6,000 gal/mo	\$2.00	
Block Rate 3 (\$1,000 gal)	6,001 gal/mo	7,000 gal/mo	\$3.00	
Block Rate 4 (\$1,000 gal)	7,001 gal/mo	12,000 gal/mo	\$4.00	
Final Block Rate (\$1,000 gal)	12,001 gal/mo		\$5.00	

Rate Structure		2012	
Block Rate 1 (\$1,000 gal)	2,001 gal/mo	2,000 gal/mo	\$1.00
Block Rate 2 (\$1,000 gal)	2,001 gal/mo	6,000 gal/mo	\$2.00
Block Rate 3 (\$1,000 gal)	6,001 gal/mo	7,000 gal/mo	\$3.00
Block Rate 4 (\$1,000 gal)	7,001 gal/mo	12,000 gal/mo	\$4.00
Final Block Rate (\$1,000 gal)	12,001 gal/mo		\$5.00

**Starting Fund Balance** FY2013

Fund Balance at the Beginning of FY2013: \$ 1,750,000

Utility Expenses Excluding Debt Service (\$ per year)	Existing	During FY2013
Salaries and Wages, Including Part-Time and Contract	\$ 200,000	
Supplies	\$ 8,000	
Utilities	\$ 5,000	
Administrative Expenses	\$ 5,000	
Lab	\$ 5,000	
Routine Repairs & Maintenance	\$ 20,000	
Water Purchase	\$ 20,000	
Sewage Availability Service	\$ 20,000	
Other Treatment & Delivery Expenses	\$ 150,000	
Depreciation & Cash Capital Expenses Excluding Debt Service	\$ 100,000	
Miscellaneous Annual Expenses	\$ 15,000	

**Assumptions** Alter FY2013

**Residential Water Monthly Bills**

Month	Existing Rates	New Rates
1	140,000.00	140,000.00

## Data Input 1

Rate\_Analysis-version2 - Microsoft Excel

**Water and Sewer Rates Analysis Model. Version 2.0**

**Inputs: Rates and Rate Structures**

*Input current rate and account information in the dark green cells to analyze projected cashflows from rate changes.*

**Rate Structure** FY: 2012 2013

Residential Rates	Existing	New
Water Base Rate	\$10.00	\$12.00
Water:		
Block Rate 1 (\$/1,000 gal)	\$1.00	\$1.25
Block Rate 2 (\$/1,000 gal)	\$2.00	\$2.25
Block Rate 3 (\$/1,000 gal)	\$3.00	\$3.25
Block Rate 4 (\$/1,000 gal)	\$4.00	\$4.25
Final Block Rate (\$/1,000 gal)	\$5.00	\$5.25
Sewer Base Rate	\$10.00	\$12.00
Sewer:		
Block Rate 1 (\$/1,000 gal)	\$1.00	\$1.25
Block Rate 2 (\$/1,000 gal)	\$2.00	\$2.25
Block Rate 3 (\$/1,000 gal)	\$3.00	\$3.25
Block Rate 4 (\$/1,000 gal)	\$4.00	\$4.25
Final Block Rate (\$/1,000 gal)	\$5.00	\$5.25

**Rate Structure** 2012 2013

Commercial Rates	Existing	New
Water Base Rate	\$10.00	\$12.00
Water:		
Block Rate 1 (\$/1,000 gal)	\$1.00	\$1.25
Block Rate 2 (\$/1,000 gal)	\$2.00	\$2.25
Block Rate 3 (\$/1,000 gal)	\$3.00	\$3.25
Block Rate 4 (\$/1,000 gal)	\$4.00	\$4.25
Final Block Rate (\$/1,000 gal)	\$5.00	\$5.25
Sewer Base Rate	\$10.00	\$12.00
Sewer:		
Block Rate 1 (\$/1,000 gal)	\$1.00	\$1.25
Block Rate 2 (\$/1,000 gal)	\$2.00	\$2.25
Block Rate 3 (\$/1,000 gal)	\$3.00	\$3.25
Block Rate 4 (\$/1,000 gal)	\$4.00	\$4.25
Final Block Rate (\$/1,000 gal)	\$5.00	\$5.25

**Rate Structure** 2012 2013

Irrigation Rates	Existing	New
Irrigation Base Rate	\$0.00	\$0.00
Irrigation:		
Block Rate 1 (\$/1,000 gal)	\$3.50	\$3.50
Block Rate 2 (\$/1,000 gal)		
Block Rate 3 (\$/1,000 gal)		
Block Rate 4 (\$/1,000 gal)		
Final Block Rate (\$/1,000 gal)		

**Tap Fees** 2012 2013

	Existing	New
Average Sewer Tap Fee	\$2,000.00	\$2,400.00
Average Water Tap Fee	\$500.00	\$600.00
Average Irrigation Tap Fee	\$2,200.00	\$2,500.00

**Number of Accounts** 2012 Growth Rate:

Residential Water	3000	0.50%
Residential Sewer	2500	0.50%
Commercial Water	200	0.50%
Commercial Sewer	80	0.50%
Irrigation Water	3000	0.50%

**Miscellaneous** 2012

	Existing
Uncollected Bills	8.0%
Non-revenue Water	15.0%

**Data Input Color Explanation:**

- White: Data to be entered, can be changed
- Black: Automatically calculated data, do not change!
- Red: Important Results

**cubic feet to gallons converter**

100 cubic feet = 748 gallons

**\$/ccf to \$/1000 gallons converter**

\$ 1.00 /hundred cubic feet = \$1.34 /1,000 gallons

*Input block sizes (state and end) in gallons/month  
Input rates in \$/1000 gallons  
Use the converters above for converting from cubic feet units*
