

Assessing Financial Condition

Glenn Barnes

Environmental Finance Center

The University of North Carolina at Chapel Hill

919-962-2789

glennbarnes@sog.unc.edu

Session Objectives

- Understanding where your water system is right now financially
- Learning some standard measures that funders will be concerned with

Can You Sleep at Night?

- Is your system self sufficient?
- Are you able to cover your debt service after paying for your day to day operations?
- If your customers stop paying their bills, how long can you maintain operations?
- Can your system meet its short term obligations?
- How much of your utility's expected life has already run out (and how much is left)?

In terms of your system's finances, how do you sleep at night?

1. Like a baby/cat
2. Some tossing and turning
3. Insomniac
4. Heavily Medicated
5. I'm not sure yet...

Statement of Net Assets

- The assets and liabilities of the water system on the day the financial statements were prepared

Statement of Revenues, Expenses & Changes in Net Assets

- Annual operating and non-operating revenues and expenses for the water system
- Also transfers to and from the general fund

Statement of Cash Flows

- Money in and money out of the water system

Notes to Financial Statements

- Explanations, where needed, to the financial statements

Operating Ratio

$$= \frac{\textit{Operating Revenues}}{\textit{Operating Expenses}}$$

Please calculate two numbers—
one including depreciation, and one
excluding depreciation

Benchmark?
Don't get close to 1.0

*Caveat – This indicator is only as good as your depreciation schedule

Why Care About This?

- Funders and ratings agencies care about this
- As you think about the future needs of your system, you have to know where you are starting from
