

Working Effectively with Decision Makers

Glenn Barnes Environmental Finance Center The University of North Carolina at Chapel Hill 919-962-2789

glennbarnes@sog.unc.edu

Session Overview

- Roles of boards and staff
- Understand strategies for getting buy-in for needed rate increases
- Learn about a recent nation-wide survey of current practices

"Full Cost Pricing"

- Operations & maintenance expenditures
- Taxes and accounting costs
- Contingencies for emergencies
- Principal and interest on long-term debt
- Reserves for capital improvement
- Source water protection

Roles of Board and Staff

Board Respo	nsibility —	2		→ Staff Res	ponsibility
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules

Decisions affecting long-term priorities such as mission, institutional direction, values, priorities and principles.

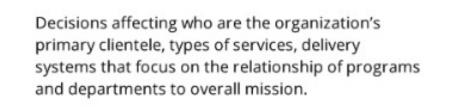

Board Respo	nsibility —			→ Staff Res	ponsibility
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules

Board Respo	nsibility —			→ Staff Res	ponsibility
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules

Decisions affecting planning, budgeting, financing, marketing, and personnel. Budget approval process, setting rates and fees.

Board Respo	nsibility —			→ Staff Res	ponsibility
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules

Decisions about day to day practices, participation in community activities, selection of contractors, interlocal agreements.

Board Respon	Board Responsibility							
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules			

Decisions affecting procedures used to handle routine transactions and normal form, process, method and application of policies.

Board Respo	nsibility —			→ Staff Res	ponsibility
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules

Decisions and regulations that guide or prescribe everyday conduct (parking, smoking areas, dress, etc.)

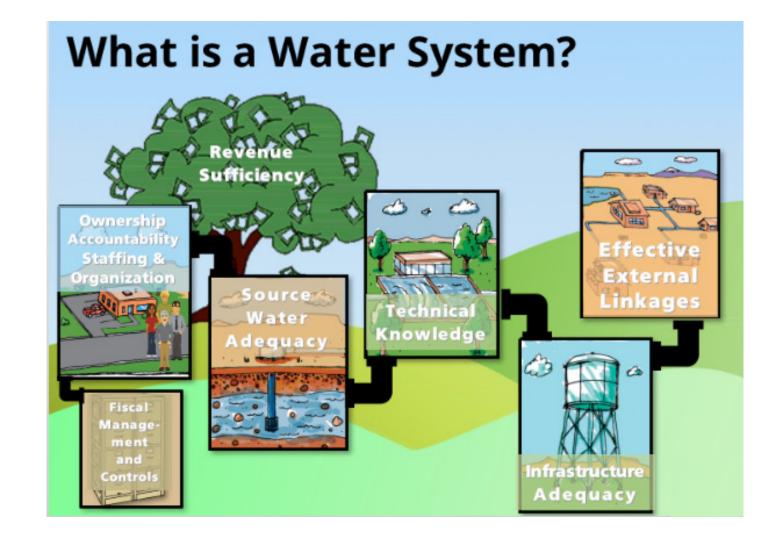

Board Respo	nsibility —			→ Staff Res	ponsibility
Strategic	Quality	Resources	Administrative	Standard Operating Procedures	Rules

Smart Management for Small Water Systems

Infrastructure Adequacy

- Infrastructure needs to be replaced as it ages or there could be a risk to public health
- Inspection schedule?
- Record of maintenance
- Inventory of assets

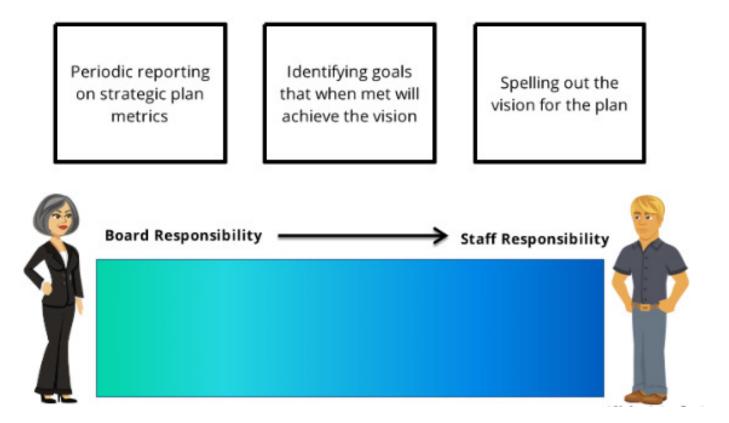

Strategic Planning (Capital Planning)

Please drag-and-drop each action related to strategic planning/capital planning on the spectrum between board and staff responsibility.

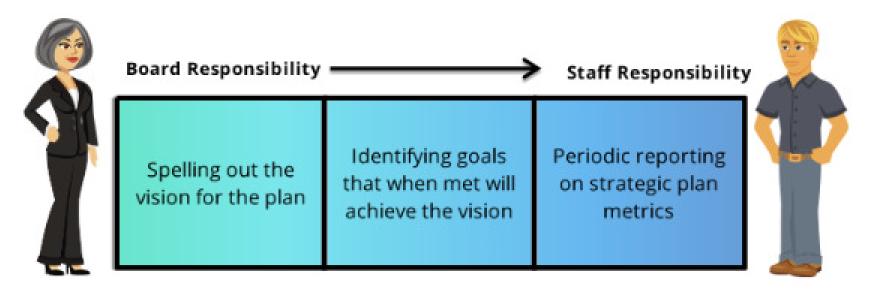

Our Recommendation

Strategic Planning (Capital Planning)

Board Accountability

- Ultimate responsibility
- What is your governance structure?
- Clear duties assigned to each manager, operator, and personnel

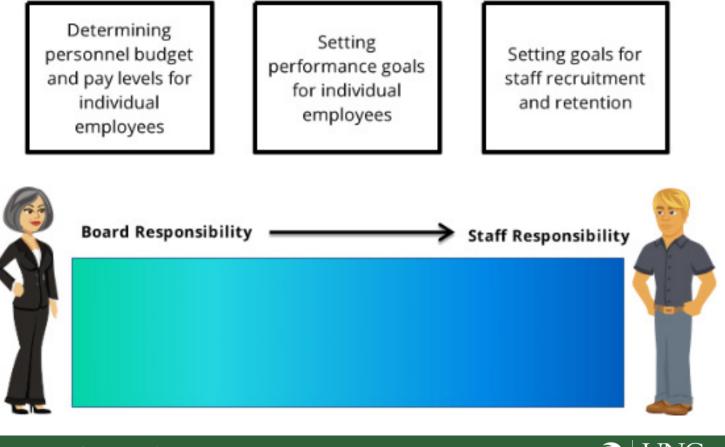

Human Resources

Please drag-and-drop each action related to human resources on the spectrum between board and staff responsibility.

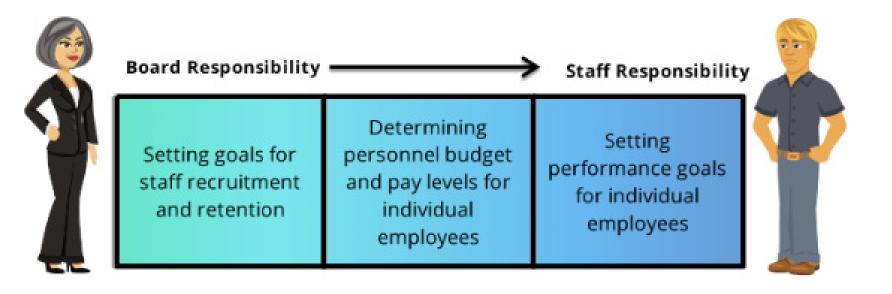

Our Recommendation

Human Resources

Revenue Sufficiency

- Having a positive net income is a sign of financial capacity
 - Do you need to increase revenues, reduce costs, or both?

Revenue Sufficiency

- Review budgets annually, but have a longer financial planning horizon
 Set aside money for long-term needs
- Review adequacy of rates—as costs go up, so too should rates

The Budget

- Financial mission statement of the system
- Close look at revenues and expenses best done by staff
- Board has the final sign-off

Creditworthiness and Fiscal Controls

- Follow accounting principles
- Establish a good credit history
- Keep records on water use, number of customers, leaks, etc.
- Policies for collection of delinquent accounts

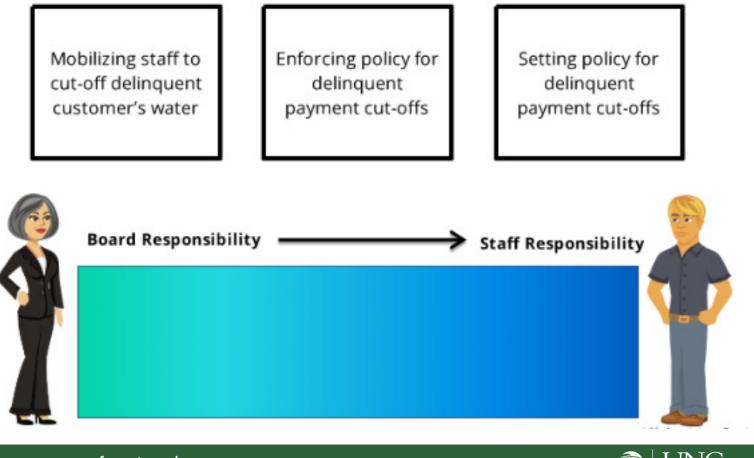

Financial Management/Collections

Please drag-and-drop each action related to financial management/collections on the spectrum between board and staff responsibility.

www.efcnetwork.org

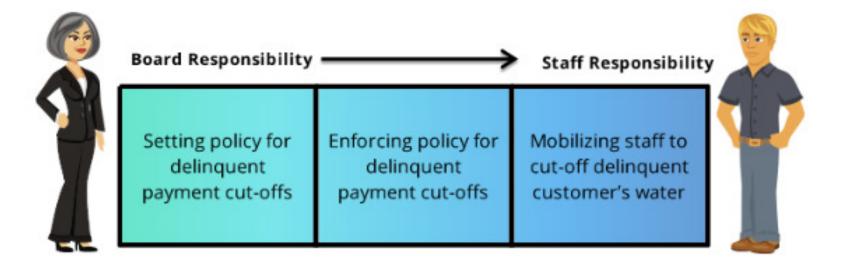

Small Water Systems

Our Recommendation

Financial Management/Collections

Customer Communication

- Informed customers are the best advocates for the system
- Helpful to have a system-wide spokesperson who is respected

Customer Communication

- SDWA requires public notification if
 - Water does not meet standards
 - Water is not tested on time
 - Water system is granted a variance or exemption from standards

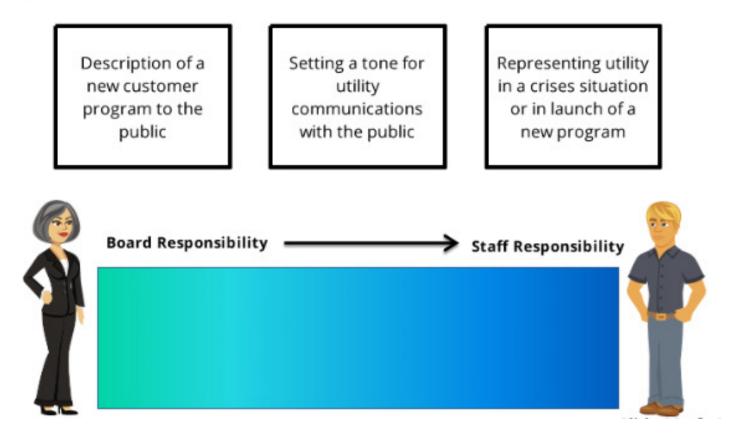

Public Relations

Please drag-and-drop each action related to public relations on the spectrum between board and staff responsibility.

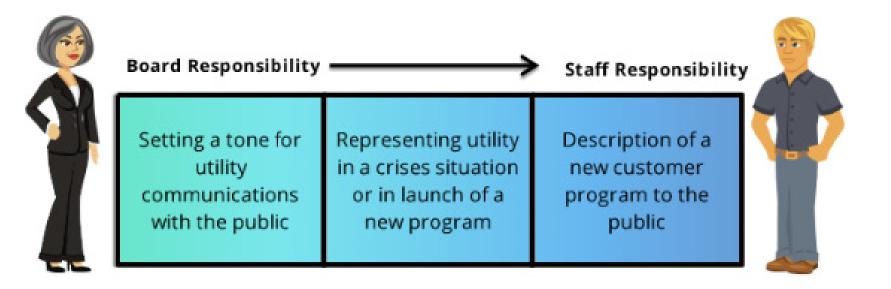

Our Recommendation

Public Relations

Some ways of getting buy-in

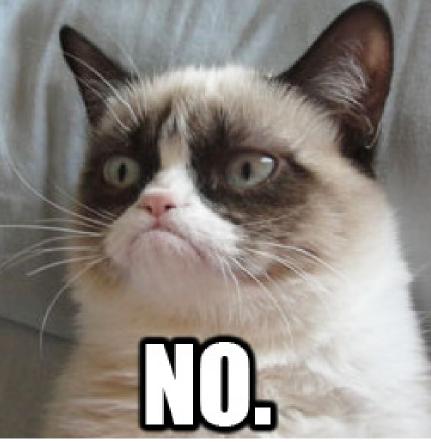

Can we get a rate increase?

Appeal Based on What's Good

Water has MWRA bubbling with joy

New process said to improve taste

By Michael Levenson GLOBE CORRESPONDENT

It is flowing, 275 million gallons a day into our homes, and, boy, is it delicious, state officials say.

Tap water flowing to 2.3 million people in Greater Boston is now dramatically better tasting, officials say, thanks to a new treatment plant in Marlborough that uses ozone to remove contaminants with a decrease in chlorine.

"It's clean, and it's crisp, and it's refreshing, and it's a great product; we'd put the taste of our water up against any bottled water," said Frederick A. Laskey, executive director of the chusetts Water Resources, ity. "Put our water refrigerator, a will server a water is good out of the

The assume treatment not only affects taste, it also makes the water safer and cleaner than the stuff Greater Bostonians have been quaffing for generations, Laskey said.

A 2001 federal appeals court ruling spurred the MWRA to use ozone as a water purifier. The US Environmental Protection Agency had asked the authority to build a more sophisticated water filtration plant to remove contaminants. But the MWRA successfully argued that an ozone system could be built that would make the wa-WATER, Page A12 "It's clean, and it's crisp, and it's refreshing, and it's a great product..."

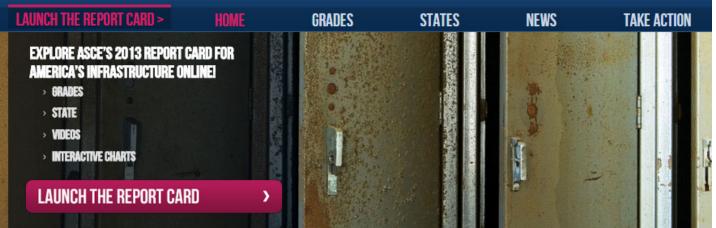

Appeal Based on What's Wrong

REPORT America's

AMERICA'S GPA:

The American Society of Civil Engineers is committed to protecting the health, safety, and welfare of the public, and as such, is equally committed to improving the nation's public infrastructure. To achieve that goal, the Report Card depicts the condition and performance of the nation's infrastructure in the familiar form of a school report card—assigning letter grades that are based on physical condition and needed investments for improvement.

ESTIMATED INVESTMENT NEEDED BY 2020:

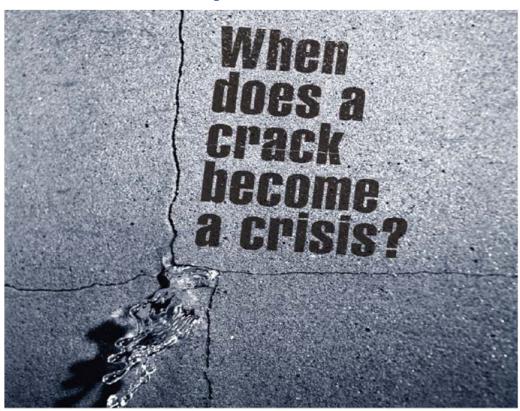

Warn of Consequences

When it shuts down our water and sewer systems. Ourwater and sewer pipes are getting older by the day, putting our community at risk for loaks and breakago. Join us in stopping this problem bofore it gets worse. Bupporting initiatives to invest in water and wastewater infrastructure. For more Information call 0000 S006-2000 or visit www.Waters.ife.net.

Pope Francis Lays Hands On Ailing U.S. Infrastructure

NEWS IN BRIEF September 25, 2015

VOL 51 ISSUE 38 News · Religion · World Leaders · Pope

NEW YORK—Treating the frail, long-overlooked structures with an unparalleled display of compassion, Pope Francis reportedly inspired a crowd of onlookers Friday by laying his hands upon the ailing United States infrastructure "My heart just melted when I watched the pope

ONION VIDEO

But how is this happening at water systems today? What is working well, and what is not?

Communicating a Rate Case: 2014 Survey on Water System Rate Communication

Methodology

	Chief Administrative Officers	Chief Elected Officials					
Matched surveys sent	5,750 (4,439 cities; 1,311 counties)	5,750 (4,439 cities; 1,311 counties)					
Surveys returned	2,110	781					
from local governments that manage and set rates for water systems	1,408	329					
Matched Sets from Same Local Government	202						

Survey was administered by ICMA from May through August 2014

Survey Objective

Identify the:

- Most important factors and information shared regarding the most recent rate increase request
- Most effective methods of communicating the need for the rate increase

Are rates getting approved?

n=1,330

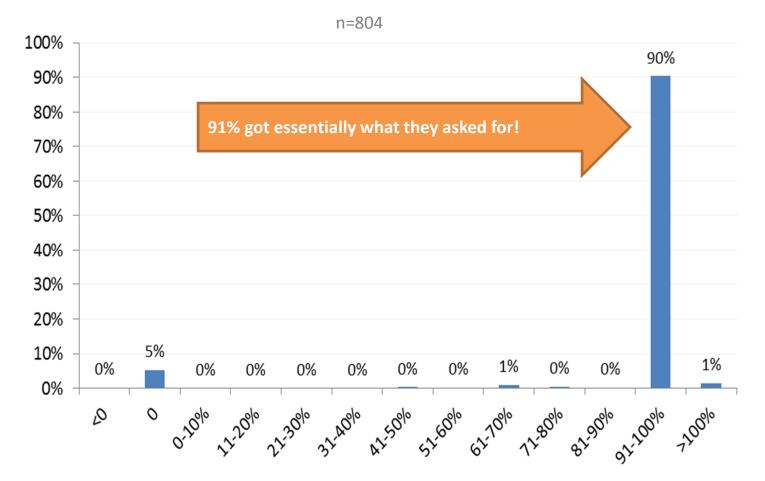

YES - 90% got a rate increase approved

What was approved vs. what was requested?

When single request was made (n=806)

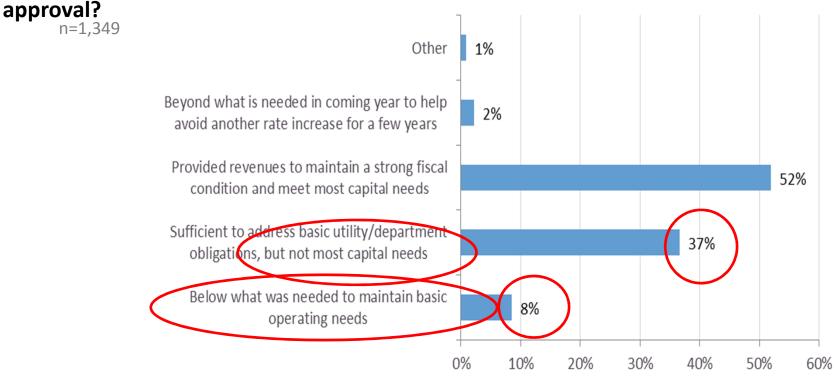

*Summary Statistics

But...did they ask for enough?

In your professional opinion, which statement below best describes the water rate increase that was proposed to the local government governing body for

Some Key Factors

- Trust (Working Relationship)
- Information Conveyed
- Public Involvement

Trust (Working Relationship)

According to administrative officers, the working relationship with the governing body is <u>not</u> related to:

- The size of the governing body
- Whether or not a rate adjustment was approved by the governing body

*Bi-variate analysis

Trust (Working Relationship)

But...the administrative officers with better working relationships with the governing board were:

- More likely to request higher rate increases
- More likely to request full-cost-recovery rate increases

www.efcnetwork.org

*Bi-variate analysis

Trust (Working Relationship)

 According to elected officials, more frequent communication and effective communication are directly related to a good working relationship

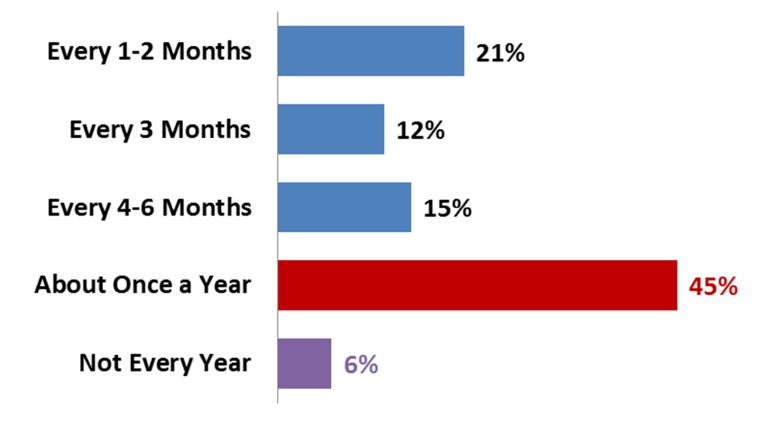

The full governing body typically meets with staff once a year or less

Highlighted were reported by Governing Boards as most helpful.

Public Involvement

The **more the public was involved**, the more likely the rate adjustment was **approved** (p<0.01)

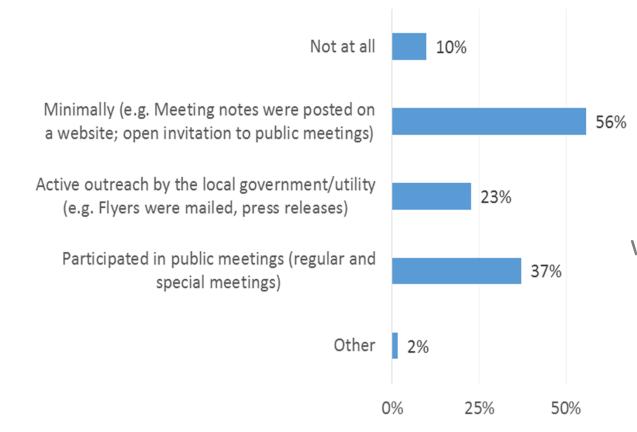

www.efcnetwork.org

UNC ENVIRONMENTAL FINANCE CENTER

Public Involvement

How the public was involved? (n=1,364)

When the public was involved, the system was 20% more likely to request a higher rate increase

The Bottom Line

Water systems are getting rate approvals, but effective and frequent communication about salient issues, along with public involvement, can make the difference in getting the rates systems need to cover capital costs.

A Favor & A Reminder

- Please fill out an eval form for us before you leave
- Contact us anytime for direct technical assistance on any finance and management topic of our project
