### Asset Management and Fiscal Planning: Understanding the Implications of HB0269

#### Training for Utah Wastewater Operators

12:00pm–3:00 pm MST VIRTUAL

With limited revenues, aging infrastructure, and regulatory obligations to meet, a comprehensive approach to managing your system is vital. This training will teach you how to: develop an inventory of utility components, identify critical assets for sustained operations; make decisions about how to operate, repair, and replace those assets; and set goals for level of service at a sustainable cost. Additionally, this training will address the managements of capital assets related to water as described in HB0269.

**Presenter:** Maureen Kerner, Associate Director, Environmental Finance Center at Sacramento State; Ella Ban, Environmental Specialist, Environmental Finance Center at Sacramento State

*CEU credits may be available for Utah Wastewater Operators.*
