Dates for Workshops 2 and 3

- Workshop 2: 9:00 am – 4:00 pm, Wednesday, January 4, 2017
- Workshop 3: 9:00 am – 4:00 pm, Thursday, January 26, 2017
- Location for both: Land-of-Sky Regional Council, Asheville, NC

Evaluations for Today's Workshop

- Please complete your evaluation form and return to Carol.
- We appreciate your honest feedback on how we're doing so we can continue to improve in the future!

Assignments – Prior to Workshop 2

- Input energy information into Energy Usage Baseline tool (Excel) until you have at least 1 - 2 years of data input.
- Please complete and email to David and Carol (see last slide) by Tuesday, December 20, 2016. Thank you!
- Using all resources at your disposal, identify 3 - 5 potential projects that could reduce energy costs at your drinking water system. (May or may not involve capital costs!)
- Be prepared to present for 10-15 minutes on both at beginning of Workshop Two. 😊

Opportunity: Technical Assistance for Water Rates & Finances + Capital Planning

- In addition to the energy cost savings measures we'll work on in this series, we can provide you with some free analysis of your water system's current rates and finances, capital planning, etc.
- We have several free Excel tools available – if you're interested, just tell Carol. We'll ask you for some data and then will provide you with one, two, or three analyses, depending on your needs! 😊

Potential Topics for 3rd Workshop?

- Renewable energy?
- Other ideas?

Questions?

- Contact us anytime with questions about the energy management assignments, course content, etc., or for direct technical assistance on any finance and management topic of our Small Systems project.
